

Pro:Centric[®] SMART Set Top Box with ULTRA HD

STB-5500 adds interactive multimedia capability on your basic commercial TVs. With the STB-5500, Ultra High Definition (UHD) video decoding and output resolution is now available, and further hardware such as DOCSIS 3.0 cable modem card can be upgraded and expanded. Since the STB-5500 supports smart IPTV functions, you can enjoy full capability of Pro:Centric[®] SMART solution.

STB-5500

- Pro:Centric[®] SMART IPTV Platform
- IP Streaming and RF Tuning
- ULTRA HD Channel Support
- Pro:Centric[®] Application Support for non-Pro:Centric TVs
- External Module Expansion Ready (DOCSIS 3.0 Modem Option Available)
- Embedded Pro:Idiom[®] decryption

Key Features

Smart Content Customization

Create your own solution along with LG's smart customization tools and content management software. With the tailored solution, hotel can elevate their brand to new levels.

Features

- Pro:Centric Smart SDK (HTML5, Java, Flash)
- Pre-loaded Apps

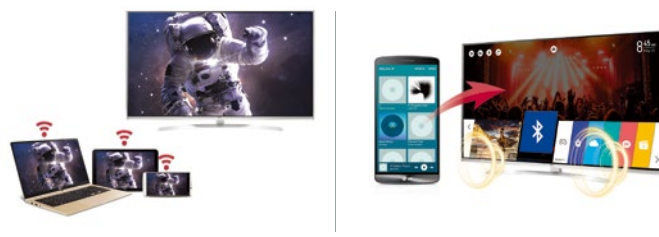

Smart Connectivity

Cross display boundaries freely and without hassle. With LG Smart Share, mirroring and content sharing between TV and other smart devices are made incredibly easy and user-friendly.

Features

- Smart Share, Screen Share -WiFi Direct, Miracast, WiDi
- Bluetooth Sound Sync.

Support ULTRA HD

The STB-5500 supports ULTRA HD video decoding and output resolution, and automatically upgrades Full HD content to ULTRA HD. With this, you can deliver clear messages and add animation on the content.

SoftAP

SoftAP means Software enabled Access Point. This "Virtual" Wi-Fi feature executes by software working on the device to create a wireless hotspot.

- * SoftAP should be set in installation menu after TV is on.
- * Screen Share may not be operated at the same time.

External Module Expansion Ready

STB-5500 is designed for additional external module expansion. This reduces the needs of cables and connectors making easier installation and management.
